

# **Technical Evaluation Reference Group (TERG) of the Global Fund**

## **TERG Update**

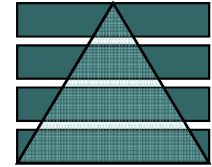

**Prof Rolf Korte, Chair of TERG  
Prof Rose Leke, Vice-Chair of TERG**

*Thirteenth Board Meeting*

*Geneva, Switzerland, 27 April 2006*

# TERG Update

---

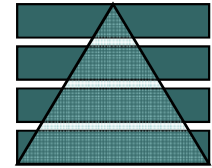

## Overview:

- Five-Year Evaluation update
- Results of 360° Stakeholder Review
- Evaluation of Proposal Development & Review Processes

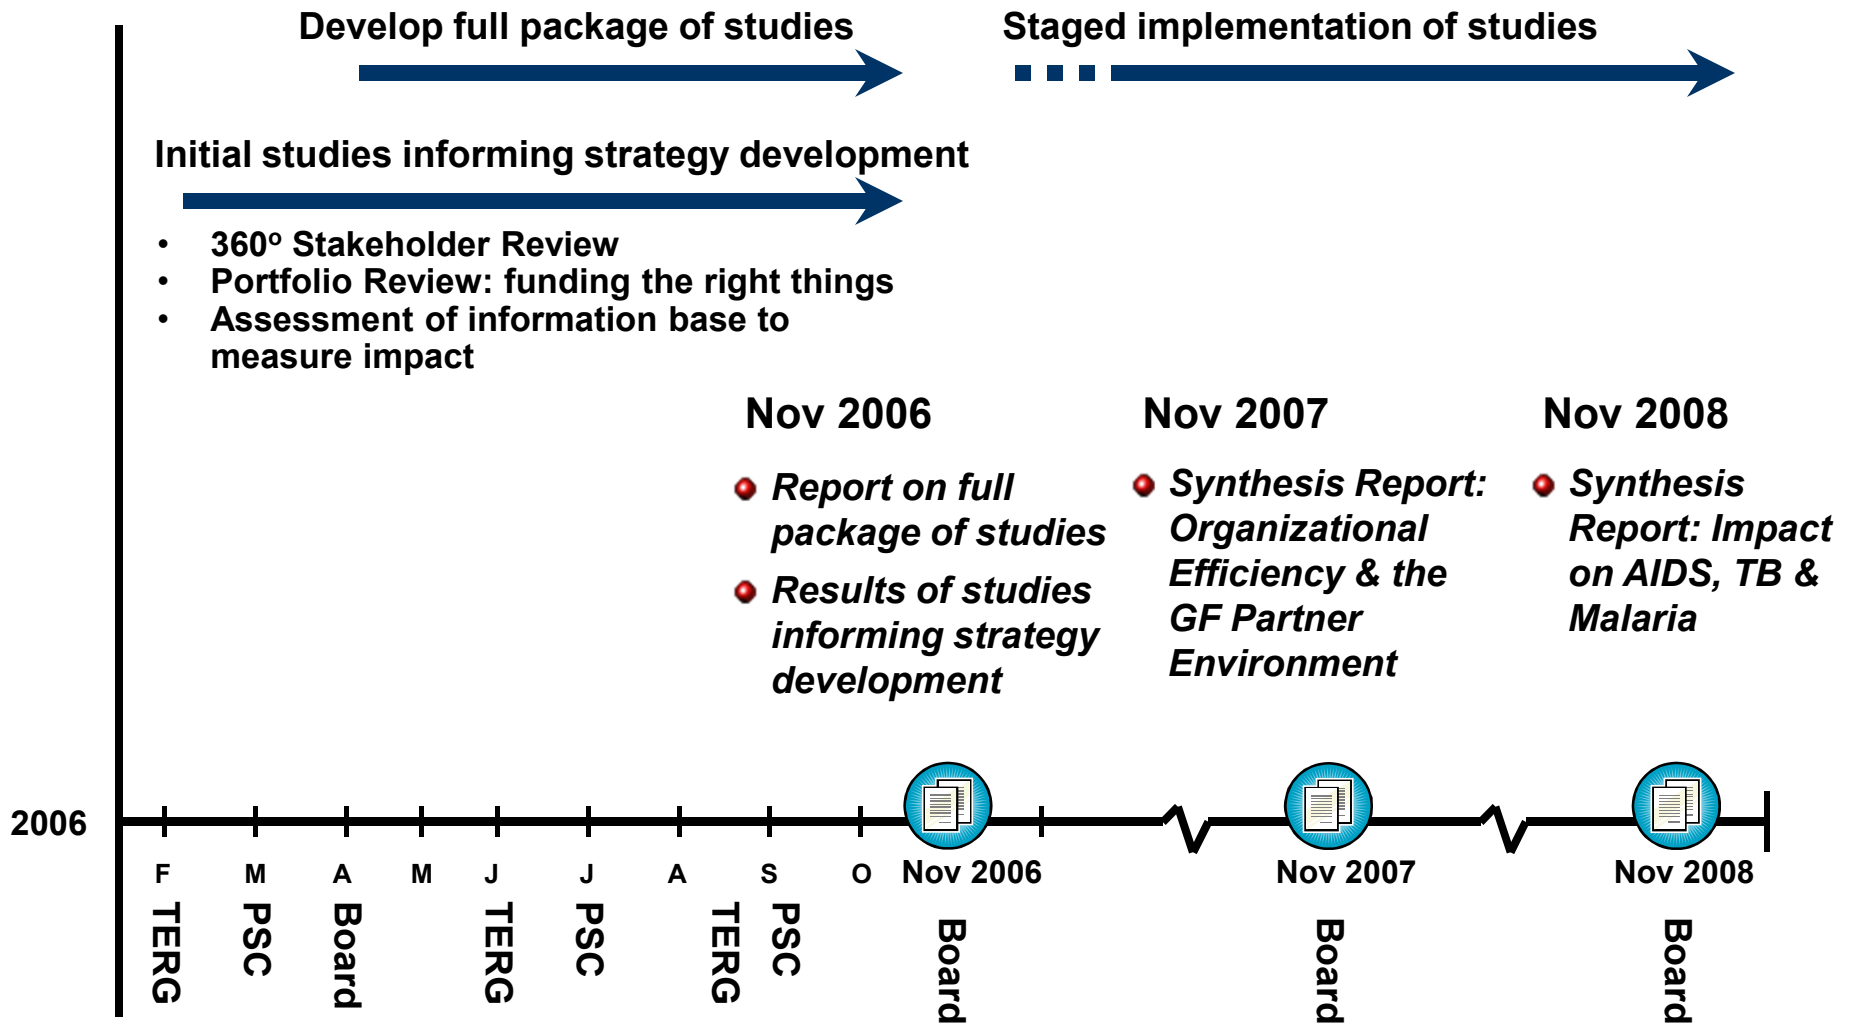

# Five-Year Evaluation Update

---

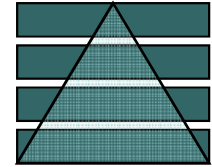

- Five-Year Evaluation follows a **phased incremental approach** producing intermediate results
- The series of studies concludes with two comprehensive reports synthesizing the results:
  - ✓ Nov 2007: **Global Fund organizational efficiency** and the **partner environment**
  - ✓ Nov 2008: final concluding **report on disease impact** (impact must be measured after grants reach their full 5-year term)

# Five-Year Evaluation Timeline and Products

# Priority studies underway

---

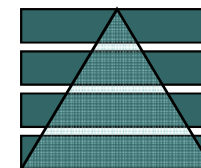

The quality of the Five-Year Evaluation depends on **clarity of focus** and a strong sense of **priority**. The TERG has thus initiated **three priority studies**:

1. To **confirm the framework**, identify critical **themes and sub-questions**:
  - 360° Stakeholder Review
2. To inform the **strategy development** process:
  - Portfolio Review
  - Preparing for Impact Measurement

# 360° Stakeholder Review Results

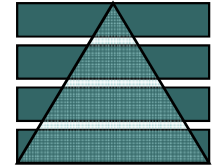

---

- High level stakeholder review confirmed the evaluation framework and overarching evaluation questions
- Key themes:
  - Inclusion of civil society and public private partnerships
  - The Global Fund partnership and technical assistance
  - Harmonization and alignment
  - Functioning of Global Fund structures including CCMs and LFAs
  - Global Fund governance
- The Board retreat provided excellent insights for specific evaluation questions on these themes
- Web-based survey tool is under development for broad stakeholder inclusion leading into the Global Fund Partnership Forum.

## Evaluation of the Proposal Development & Review Process: Major Findings

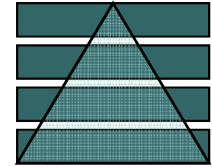

---

- Urgent need to **improve communication and common understanding** of GF policies and procedures among partners.
- The **Technical Review Panel** self assessment process and related report are extremely valuable.
- Proposal guidelines should emphasize the importance of **on-going technical assistance** and the need to build TA into the proposal and budget.

## Evaluation of the Proposal Development & Review Process: Major Findings

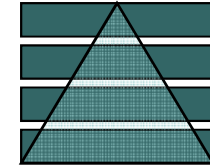

---

- Need for improved information on **country capacity to implement grants** in order to better inform TRP decision-making.
- The TRP should consider to what extent proposals are coherent with, or inform the development of, credible national strategies and plans.

# Thank you on behalf of the TERG

**BARR David**

Senior Philanthropic Advisor, Tides Foundation USA

**BERTOZZI Stefano**

Director of Health Economics & Policy  
Visiting Professor for Economics Research and Education;  
Instituto Nacional de Salud Publica Mexico
